

Dulas Connected **Wireless** Temperature Monitoring

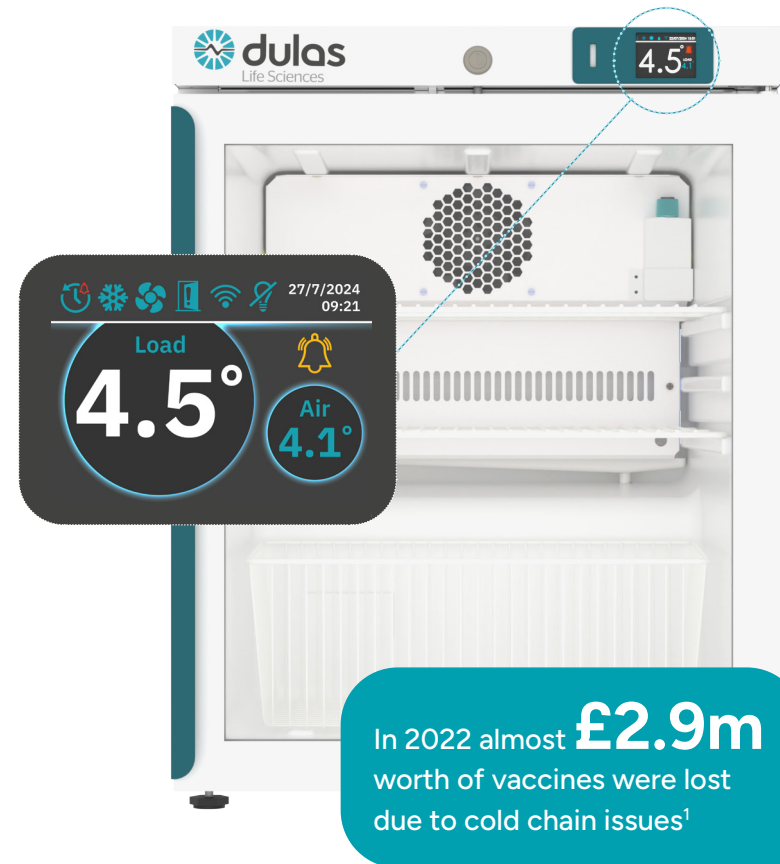

Dulas Connected

People. Purpose. Planet.

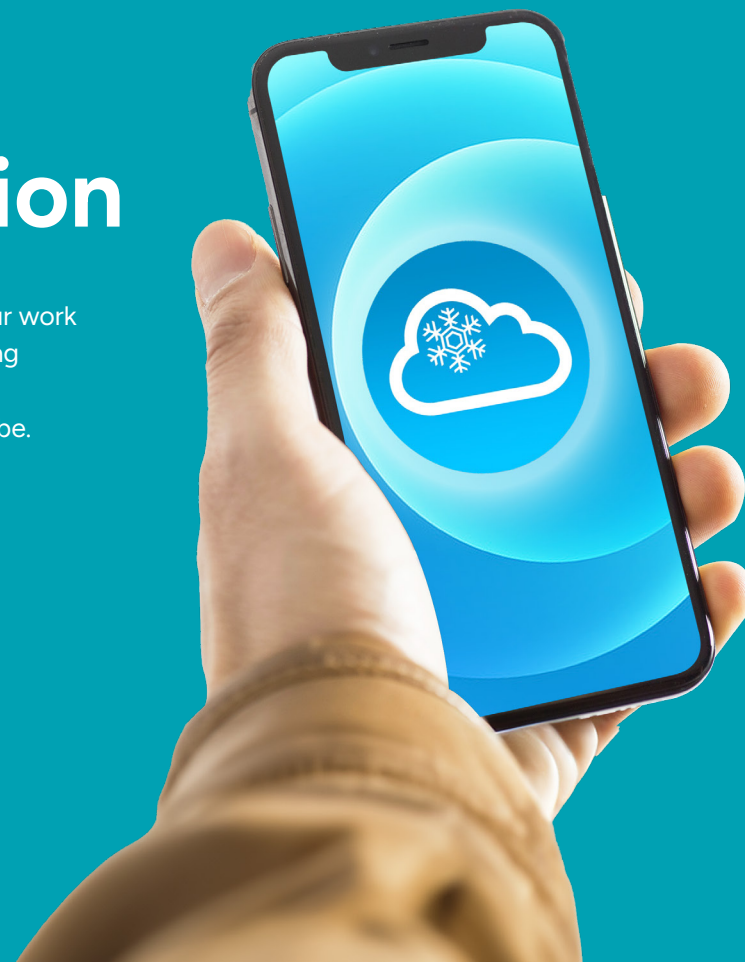

Our intuitive range of Pharmacy and Laboratory refrigerators feature built-in wireless monitoring software, enabling you to access the refrigerator's performance remotely, via our portal. We understand that the contents of your refrigerator are valuable and that it's imperative they are kept within temperature.

Should your temperature drift or should the unit go into alarm state, our proactive Dulas Connected Range will alert you so immediate action can be taken.

Connected Communication

With proactive alerts, you can relax, focus on your work and be safe in the knowledge that should anything occur with your valuable temperature-controlled contents, you will be notified wherever you may be.

Features

Access: Whether via the desktop portal, or via the app, you can access your refrigerators' alarm state and related information from wherever you may be.

Scalability: An unlimited number of connected devices can be seen from your portal across any location.

Immediate alarms: In the event of an alarm status, you will be notified via the app or by email to ensure action can be taken to preserve your contents.

Data storage: There is no need to archive data, you can access all historical data at any time.

Ease of recording: Temperature data is downloadable in CSV format for your records.

Accurate history: You can view the performance history and add comments for any actions taken, ensuring a seamless, recorded data trail.

Secure: Wireless communication of temperature data is securely stored on your portal. All data is backed up with failsafe data recovery in place.

Reliable monitoring: Refrigerator temperature is recorded at regular intervals allowing you to view an up-to-date status overview in just a few moments. All reports can be automated via email whether daily, weekly or monthly.

Simplicity: You can view at a glance whether your devices are operating as they should from your homepage, or should you need to look a little deeper, there are quick view temperature graphs for every refrigerator.

Data Access: The portal is powered by Beyond Wireless Technologies Ltd. Direct access to databases is restricted to authorised Beyond Wireless personnel only. Access via the GUI (browser-based Graphical User Interface) is controlled via username, password, privilege profiles and access profiles. All data is 100% owned by the customer and will not be shared with any 3rd party unless formally requested in writing by the customer. All data is secured and encrypted as follows: Browser (in-transit) - TLS 1.2 256-bit RSA encryption; Data (at-rest) - AES-256 encryption.

Credentials:
WHO- PQS Certified (Performance Quality, Safety)
ISO/IEC27001 - 2022 (Information Security Management System)
ISO9001 - 2015 (Quality Management System)
SSL Labs rating: A+
