

JOB DESCRIPTION MET MAST INSTALLER

Date: April 2021

Work Area: Wind Monitoring

Based at: Inverness

Contract Term: Permanent

Hours per week: Minimum 24 working days per quarter

Responsible to: Wind Monitoring Commercial Lead

Responsible for: N/A

Pay Band and Scale: Engineering & Project Management Family - £14.35 per hour

Job Purpose: Reporting to the Site Supervisor you will be an important member of the installation team, contributing to a high standard of work on site and assisting more junior team members to achieve this high standard. Your role is to work on all areas of met mast installation on both tilt up and lattice masts.

**Key
Accountabilities:**

Mast Work: -

- Install, decommission, refurbish and maintenance of met masts as part of site team.
- Aware of site safety, team safety, team briefings and mast work where no lifting operations are taking place.
- Assist with mast positioning, layout and placement of anchors.
- Assist with accurate placement of instrumentation on mast.
- Assist with setup of instrumentation systems.
- Handle all client stock with utmost care and attention
- Ensure appropriate PPE is worn at all times
- Maintain professional and technical knowledge by attending training and educational workshops.

Unloading / Loading and Site Equipment: -

- Assist with the loading and unloading of vehicles prior to and after site works, whilst ensuring equipment does not sustain any damage.

Lifting / Lowering: -

- Take part in any lifting procedures required during site work
- Safe use of any lifting equipment and tools, ensuring that all items are returned after use.
- Complete tasks as instructed by Mast Site Supervisor
- Assist the Site Supervisor with the on-the-job training and mentoring for new and inexperienced mast installers.
- Safe operation, cleaning and maintenance of vehicles, tools

and equipment in accordance with company procedures and POWER/LOLER regulations. Any defects or failures must be reported to the procurement manager.

Depot.

- Loading and unloading vehicles prior to and after works, ensuring that all lifting equipment is returned to correct locations. Your activities in the depot may be under the direction and control of the procurement manager.
- You may be required to work at the Dalcross depot, in addition to the routine requirements of mobilisation / demob at the depot.
- You are responsible for your own health & safety on site, as well as that of your colleagues. You must comply with all company policies and procedures and

HSQE.

- Ensure compliance with Dulas ISO / quality policy and procedures.
- Comply fully with document management systems of the department.
- Comply with Dulas H & S policy.
- Pro-active identification of potential improvements / future work.
- Work to supplied method statements and risk assessments.
- Report to Mast Site Supervisor or the Project Manager any risks which you feel are not being properly managed.

Problem Solving.

- You will be expected to be proactive, dynamic and constructive in relation to solving any problems arising on site or with any other aspect of the Wind Monitoring Department. You will continually monitor and review your area of responsibility with the aim of continued improvement. Any suggestions for improvement are welcome – please feel free to raise them at the periodic Wind Monitoring meetings or directly with the Project Managers.

Person Specification: Essential Criteria

Skills, experience & qualifications	Experienced lattice tower climber. Knowledge of the lifting operations and lifting equipment regulations 1998 (LOLER 98). Willing to work at height and be trained in safe working procedures for working at height - typically ladder works. Understanding of safe working practices and health & safety issues on construction / installation sites. Able to take considered decisions on site, whilst understanding when
-------------------------------------	---

issues need to be escalated to others for information or resolution.
Willingness to undertake relevant training courses and obtain certificates, as appropriate.
